

# MONITORING AND MANAGEMENT FEATURE BRIEF

## LIFE IN THE FAST LANE WITH NO TIME TO STOP

Your day can go from zero to sixty at the drop of a hat. Customers have problems, billing is an issue, and your staff need help.

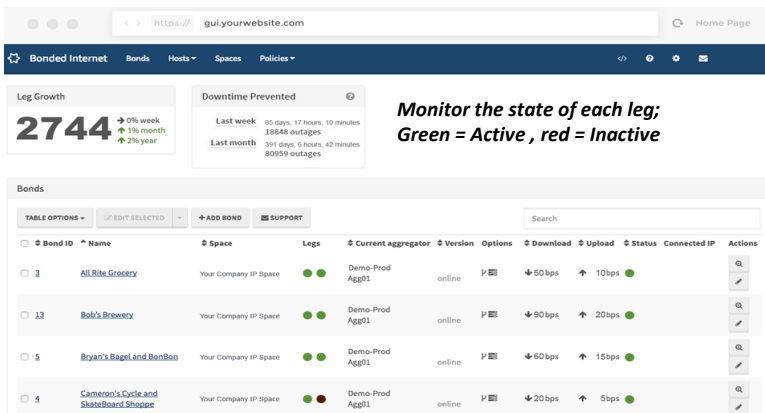

The last thing you want to do is deal with an ISP or telecom to resolve application performance issues resulting from network congestion, packet loss, flapping or outages.

## SDWAN INTERNET: SEE THE BIG PICTURE

SDWAN Internet gives you the ability to monitor and manage the networks that customers use to connect to your managed services. Proactively monitor network statistics and respond in real-time to keep your customers happy. Identify and resolve network issues that impact end-user experience and satisfaction. Reduce trouble-tickets and time to resolution.

## BE PRODUCTIVE IN THE FAST LANE

Let us expertly pinpoint issues in real-time. We take care of your network so you can focus on what matters – keeping your business productive.

## SDWAN INTERNET BENEFITS

### PROACTIVE REPORTING OF REAL-TIME NETWORK ISSUES:

- Jitter
- Latency
- Packet-loss
- Bandwidth fluctuation
- Connection state changes
